

ACKNOWLEDGMENTS

The author wishes to express his deep gratitude for the support and encouragement of many members of the academic community who made this study possible in a troubled but promising area of research. Particular appreciation is extended to Dr. Hans Hofmann, who was a continuing source of counsel and inspiration, and to Dr. Timothy Leary, who assisted with the execution of the experiment. Through the guidance of the thesis committee, the author's perspectives have been clarified and deepened. Mr. Peter H. John contributed much time and tireless effort toward the mechanics of the manuscript. Finally, the author desires sincerely to thank all the persons who volunteered to participate in this investigation as experimental subjects or group leaders.

LIST OF TABLES	vi
 Chapter	
I. INTRODUCTION	1
II. RELIGION AND PSYCHEDELIC SUBSTANCES: A SURVEY.	5
Data from History, Archaeology, Anthropology, Botany, and Psychopharmacology Data from Clinical Research	
III. THE DEFINITION OF MYSTICISM	24
Mystical Experience in General	
The Relationship Between Mystical Experience and Religious Experience	
The Universality of the Characteristics of Mystical Experience	
Primary Experience versus Interpretation	
Phenomenological Typology of Mystical States of Consciousness	
Category I: Unity	
Category II: Transcendence of Time and Space	

Category III: Deeply Felt Positive Mood
 Category IV: Sense of Sacredness
 Category V: Objectivity and Reality
 Category VI: Paradoxicality
 Category VII: Alleged Ineffability
 Category VIII: Transiency
 Category IX: Persisting Positive Changes
 in Attitude and Behavior
 The Continuum of Mystical Experiences

IV.	EXPERIMENTAL DESIGN	85
	Non-drug Factors	
	Choice of Drug	
	Recruitment and Pre-testing of Subjects	
	Preparation and Grouping of Subjects	
	Experimental Procedure	
	Drug Preparation	
	Protocol during the Experimental Day	
	Collection of Data after the Experiment	
V.	DATA USED IN MATCHING OF SUBJECTS	110
	Pre-drug Questionnaire and Interview Data	
	California Psychological Inventory Data	
VI.	DATA FROM QUESTIONNAIRES, INTERVIEWS, AND CONTENT ANALYSES	121
	Data Relevant to the Categories of the Typology of Mysticism	
	Other Data	
VII.	GENERAL DISCUSSION AND CONCLUSIONS	211
	Discussion of Design	
	Observations of the Experimenter during the Experiment	
	Summary and Discussion of Data	
	Conclusions	
VIII.	SUGGESTIONS FOR FURTHER RESEARCH AND IMPLICATIONS FOR THE FUTURE	244

APPENDIX	261
A. Medical History Form for Volunteer Subjects for Psilocybin Research	261
B. Pre-Drug Experience Questionnaire	263
C. Post-Drug Questionnaire with Significance Levels of the Difference Between Scores of Experimentals and Controls	266
D. Follow-up Questionnaire with Significance Levels of the Difference between Scores of Experimentals and Controls	274
E. Content Analysis	283
Content Analysis Instruction Manual for Judges	
Content Analysis Score Sheet Used by Judges with the Probability for each Item that the Difference between Experimentals and Controls was due to Chance	
Reliability of Judges as Determined from Kendall Rank Correlation Coefficient (T)	
F. Explanation of the Columns and Symbols Used in the Category Tables	298
G. Data Not Directly Relevant to Categories of the Typology of Mysticism	299
Group I: Integrative and Constructive Phenomena	
Group II: Disturbing Changes in Attitude and Behavior	
Group III: Physical Sensations	
Group IV: Miscellaneous	
BIBLIOGRAPHY.	303

LIST OF TABLES

Table	Page
1. Data Used in Matching Pairs of Subjects from Pre-Drug Questionnaires and Interviews	116
2. From the California Psychological Inventory: Relevant Scores Used in Matching Pairs of Subjects. .	119
3. Category I: Unity (Combination of All Subcategories)	127
4. Category I: Unity (Internal Unity)	128
5. List of Items Used to Measure Internal Unity . . .	130
6. Category I: Unity (External Unity)	133
7. List of Items Used to Measure External Unity . . .	134
8. Category I: Unity (Supplementary Phenomena) . . .	138
9. List of Supplementary Phenomena of Unity	139
10. Category II: Transcendence of Time and Space (Combination of all Subcategories)	141
11. Category II: Transcendence of Time and Space	142
12. List of Items Used to Measure Transcendence of Time and Space	143
13. Category III: Deeply Felt Positive Mood (Combination of all Subcategories)	147
14. Category III: Deeply Felt Positive Mood (Most universal phenomena: joy, blessedness, & peace. Less universal: love)	148
15. List of Items Used to Measure the Most Universal Phenomena of Deeply Felt Positive Mood (Joy, Blessedness, and Peace)	149

Table	Page
16. List of Items Used to Measure Love	154
17. Category IV: Sense of Sacredness (Combination of all Subcategories)	158
18. List of Items Used to Measure Sense of Sacredness.	159
19. Category IV: Sense of Sacredness (Phenomena with Implicit Indication of Sense of Sacredness. Phenomena which Explicitly Mention the Holy, Sacred, and Divine)	162
20. Category V: Objectivity and Reality (Combination of all phenomena. Most essential Phenomena)	168
21. List of Items Used to Measure Objectivity and Reality	169
22. Category VI: Paradoxicality (Combination of all Items)	177
23. List of Items Used to Measure Paradoxicality . . .	178
24. Category VII: Alleged Ineffability (Combination of all Items)	182
25. List of Items Used to Measure Alleged Ineffability	183
26. Category VIII: Transiency (Combination of all Phenomena. Essential Phenomena)	187
27. List of Items Used to Measure Transiency.	188
28. Category IX: Persisting Positive Changes after Six Months	193
29. List of Items Used to Measure Persisting Positive Changes in Attitude and Behavior	194

30. Category IX: Persisting Changes <u>Toward Self</u> after Six Months (Persisting POSITIVE Changes. Persisting NEGATIVE Changes)	199
31. Category IX: Persisting Changes <u>Toward Others</u> after Six Months (Persisting POSITIVE Changes. Persisting NEGATIVE Changes)	200
32. Category IX: Persisting Changes <u>Toward Life</u> after Six Months (Persisting POSITIVE Changes. Persisting NEGATIVE Changes)	201
33. Category IX: Persisting Changes <u>Toward Experience</u> after Six Months (Persisting POSITIVE Changes. Persisting NEGATIVE Changes)	202
34. Summary of Significance Levels Reached by Experimental Group for Categories Measuring the Typology of Mysticism	221
35. Summary of Data Measuring Degree of Completeness or Intensity of Categories of the Typology of Mysticism	222
