Prague, Czechoslovakia, October 5, 2007:
The VIZE97 Foundation, created by playwright and former Czech president Vaclav Havel, presented a Lifetime Achievement Award to Dr. Stanislav Grof, one of the world’s leading psychedelic researchers. Dr. Grof, who was born near Prague in 1931, pioneered LSD-assisted psychotherapy in Czechoslovakia until he emigrated to the United States in 1967. See page 14 for the story.

Congratulations, Stan!
