MAPS: Who We Are

Founded in 1986, the Multidisciplinary Association for Psychedelic Studies (MAPS) is a 501(c)(3) non-profit research and educational organization that develops medical, legal, and cultural contexts for people to benefit from the careful uses of psychedelics and marijuana.

MAPS furthers its mission by:

- Developing psychedelics and marijuana into prescription medicines.
- Training therapists and working to establish a network of treatment centers.
- Supporting scientific research into spirituality, creativity, and neuroscience.
- Educating the public honestly about the risks and benefits of psychedelics and marijuana.

MAPS envisions a world where psychedelics and marijuana are safely and legally available for beneficial uses, and where research is governed by rigorous scientific evaluation of their risks and benefits.

MAPS relies on the generosity of individual donors to achieve our mission. Now that research into the beneficial potential of psychedelics is again being conducted under federal guidelines, the challenge has become one of funding. No funding is currently available for this research from governments, pharmaceutical companies, or major foundations. That means that the future of psychedelic and marijuana research is in the hands of individual donors. Please consider making a donation today.

Rick Doblin, Ph.D., Founder and Executive Director, earned his Ph.D. in Public Policy from the Kennedy School of Government at Harvard University. Doblin was also in Stan and Christina Grof’s first training group to receive certification as a Holotropic Breathwork practitioner.

Michael Mitrofoner, M.D., Clinical Investigator/Medical Monitor, is a psychiatrist practicing in Charleston, SC, where he divides his time between clinical research and outpatient clinical practice specializing in treating posttraumatic stress disorder (PTSD) with an emphasis on experiential methods of psychotherapy. He is a certified Holotropic Breathwork Facilitator and trained in EMDR and Internal Family Systems Therapy.

Annie Mitrofoner, BSN, MDMA/PTSD Study Co-Investigator, is a Registered Nurse who lives in Charleston, SC where she divides her time between clinical research and outpatient clinical practice specializing in treating posttraumatic stress disorder (PTSD) with an emphasis on experiential methods of psychotherapy. She is a certified Grof Holotropic Breathwork Practitioner and is trained in Hakomi Therapy.

Bryce Montgomery, Web and Multimedia Associate, studied film production at West Valley College, joining MAPS as Social Media Intern in the summer of 2011. Bryce now serves as Multimedia Associate, bringing his background in film production and social media to public education about psychedelics.

Tess Goodwin, Development Assistant, has a B.A. in Psychology from the University of California, Santa Cruz; where she focused most of her time on social psychology and newspaper production. She is a mycophile, artist, and language enthusiast.

Virginia Wright, Director of Development Prior to joining MAPS in 2011, Virginia was a marketing and fundraising consultant, and held management level positions at the Santa Cruz Symphony, KUSP Radio, The Global Fund for Women, and Soviet American Performing Arts Exchange. She earned her B.A. in International Relations from San Francisco State University, and her M.B.A. from Santa Clara University.

Sara Jordan, Publications Associate, received her B.A. in Psychology from Stanford University, where her work included research on motor learning in children, investigation of flow state phenomena, and a thesis that developed a neuroeconomic framework for understanding the phenomenon of boredom. Prior to joining MAPS, she worked as a Clinical Research Coordinator at private clinical trials site, investigating potential treatments for Alzheimer’s Disease.

Ben Shechet, Clinical Study Assistant, received his BA in Psychology from Princeton University, where his work included research on motor learning in children, investigation of flow state phenomena, and a thesis that developed a neuroeconomic framework for understanding the phenomenon of boredom. Prior to joining MAPS, he worked as a Clinical Research Coordinator at a private clinical trials site, investigating potential treatments for Alzheimer’s Disease.
