

Chronic Pain Study

Do you use OxyContin?

Get paid to travel to San Francisco and earn money in a NIDA approved research project!

You may be eligible to take part in a study in San Francisco, that assess whether using vaporized marijuana affects the safety of prescribed opioids in patients treated for chronic pain.

You can have your travel and lodging paid for, and receive \$520 for participating.

This study will assess the clinical safety of using marijuana with opioids by monitoring the short-term side effects associated with combined therapy.

TO JOIN THIS STUDY, YOU MUST:

- Have ongoing chronic pain
- Be 18 or older
- Be taking OxyContin daily
- Be willing to not smoke marijuana for a month prior to entering the study
- Not be a cigarette and/or cigar smoker, or be willing not to smoke for two weeks before starting the study
- Meet some additional criteria

IF YOU ARE ELIGIBLE, YOU WILL:

- Spend five days and nights in a clinical research center at San Francisco General Hospital
- Have blood tests and other measurements done
- Inhale vaporized medical marijuana three times a day
