

Joseph St. Laurent
President, CSO
Chemic Laboratories, Inc.
480 Neponset Street, Building 7
Canton, MA 02021

Dear Joseph,

I have reviewed the study protocol "Evaluation of Volcano® Vaporizer for the efficient emission of THC, CBD and CBN and the significant reduction and/or elimination of total particulate matter (TPM) and Tar components (various organic compounds in TPM that absorb UV radiation) obtained from NIDA" sponsored by the Multidisciplinary Association for Psychedelic Studies. I have reviewed the protocol with particular attention to the technical issues and concluded that the study is of scientific merit.

Respectfully

John Dietrich, Ph.D.
Vice President of Clinical Operations
