Founded in 1986, the Multidisciplinary Association for Psychedelic Studies (MAPS) is a 501(c)(3) non-profit research and educational organization that develops medical, legal, and cultural contexts for people to benefit from the careful uses of psychedelics and marijuana.

MAPS furthers its mission by:

- Developing psychedelics and marijuana into prescription medicines.
- Training therapists and working to establish a network of treatment centers.
- Supporting scientific research into spirituality, creativity, and neuroscience.
- Educating the public honestly about the risks and benefits of psychedelics and marijuana.

Correction: The editors sincerely apologize for mistakenly crediting MAPS Policy and Advocacy Director Natalie Ginsberg as author of an article in the Winter 2019 edition of the *MAPS Bulletin*, entitled "Policy and Advocacy News." Ginsberg did not write the article, and it contained incomplete and out-of-date information. Thus, it has been withdrawn in its entirety from the online edition. We take attribution errors seriously and are taking steps to improve our editorial process.
